

HAMMAD KHAN

Senior Full-Stack Software Engineer

Phone: 647-267-1033 | **Email:** hammadullahkhan@gmail.com | **Location:** Brampton, ON
LinkedIn: [linkedin.com/in/hammadullahkhan](https://www.linkedin.com/in/hammadullahkhan) | **GitHub:** github.com/hammadullahkhan

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 15+ years architecting AI-integrated, cloud-native applications for Fortune 500 clients including CIBC, Informatica, and Ericsson. Proven expertise in reducing infrastructure costs by 40%+, improving system performance by 60%+, and leading distributed teams to deliver scalable solutions serving millions of users. Specialized in healthcare (HL7/FHIR), fintech, and enterprise SaaS platforms using modern stacks and AI-powered development tools.

TECHNICAL SKILLS

AI-Powered Development: Cursor AI, GitHub Copilot, DeepSeek, ChatGPT, Prompt Engineering

Cloud & Infrastructure: AWS (EC2, S3, Lambda, DynamoDB, RDS, SQS, CloudWatch), Azure (Pipelines, Functions), Terraform

Backend: Python, Node.js, PHP, Java, Django, NestJS, Next.js, Spring Boot, Laravel, Express, RESTful APIs, GraphQL, Microservices

Frontend: React, Angular, TypeScript, JavaScript, RxJS, Redux, NGRX, React Native, Responsive Design

Databases & Caching: PostgreSQL, MySQL, SQL Server, Oracle, MongoDB, DynamoDB, Redis, Memcached, Prisma ORM, Propel

DevOps & Tools: Docker, Jenkins, CI/CD, Git, Agile/Scrum, JIRA, Performance Optimization

Testing: Jest, Jasmine, Karma, Unit Testing, Integration Testing, Load Testing

Compliance & Standards: HL7, FHIR, EHR, FDA, HIPAA, AODA/WCAG 508

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CCSI OBIX | Remote, Chicago, IL | May 2022 - Present

Technologies: AI Tools, Python, Node.js, PHP, AWS, Angular, React, React Native, TypeScript, PostgreSQL, HL7/FHIR

- **Led architecture redesign** of HL7-compliant fetal monitoring platform (OBIX Perinatal Data System), scaling capacity 60% from 900 to 10,000+ concurrent clinical panels while maintaining 99.99% SLA across 900+ hospitals nationwide
- **Engineered AI-assisted development workflow** using Cursor AI and GitHub Copilot, accelerating feature delivery by 50% and reducing code review cycles by 35% across distributed team
- **Optimized critical healthcare API performance** by implementing custom monitoring and alerting solution, reducing error rates by 55% and preventing potential patient data access issues affecting 50,000+ daily clinical users
- **Reduced operational overhead by 30%** through implementation of Fluent-D centralized logging system, consolidating multi-server log management and decreasing incident response time by 60%
- **Mentored 5 junior engineers** on modern development practices, cloud architecture, and AI-assisted coding, resulting in 25% faster feature delivery and improved code quality metrics
- **Managed offshore development teams** across 3 time zones (US, India, Eastern Europe), implementing Agile ceremonies and documentation standards that improved cross-team collaboration and sprint velocity by 40%

Senior Software Engineer | Informatica | Remote, Toronto, ON | Sep 2020 - May 2022

Technologies: Node.js, AWS, Angular 10, React, TypeScript, Jest, Microservices, AODA/WCAG 508

- **Architected and delivered Entity 360 golden record solution** enabling enterprise clients to create customizable master data workflows, supporting 1M+ workflow executions monthly across Fortune 500 customers
- **Achieved full AODA and WCAG 508 compliance** for customer-facing applications, reducing accessibility-related support tickets by 65% and expanding market reach to government and regulated industries
- **Designed and implemented Provisioning 360 UI** with dynamic workflow builder, enabling 500+ enterprise clients to configure custom provisioning processes without engineering support, reducing implementation time from weeks to hours
- **Improved application performance by 45%** through implementation of lazy loading, code splitting, and intelligent caching strategies in React/Angular applications
- **Collaborated with Product and UX teams** to define technical requirements and deliver user-centered solutions aligned with business objectives

Senior Software Engineer | PHL Insurance | Cambridge, ON | May 2019 - May 2020

Technologies: Angular 8, TypeScript, RxJS, NGRX, Guidewire, Docker, Karma/Jasmine, REST APIs

- **Integrated 12+ Guidewire REST APIs** into Angular SPA for Claims Center/Vendor Engagement platform, reducing data load time by 40% and improving user experience for 5,000+ insurance agents
- **Implemented mobile-first responsive design** using Angular Material and custom components, improving cross-device engagement by 25% and reducing mobile support tickets by 50%
- **Established comprehensive testing framework** achieving 85%+ code coverage with Karma/Jasmine, reducing production defects by 60%
- **Optimized state management** with NGRX, reducing unnecessary API calls by 35% and improving application responsiveness

Senior Software Engineer (Lead) | CIBC Wealth Management | Toronto, ON | Sep 2018 - May 2019

Technologies: Angular 7, TypeScript, RxJS, NGRX, Karma/Jasmine, Agile/Scrum

- **Led team of 8 developers** in Agile delivery of 15+ quarterly features for \$1.2B wealth management platform, consistently beating deadlines by 20% while maintaining zero critical production incidents
- **Delivered high-stakes features** for client portfolio management, trading interfaces, and reporting dashboards serving 100,000+ wealth management clients
- **Established frontend architecture standards** and reusable component library, reducing development time for new features by 30%
- **Implemented CI/CD pipeline improvements** that reduced deployment time from 2 hours to 15 minutes and increased deployment frequency by 3x

Senior Software Engineer | Ericsson Canada | Mississauga, ON | Jan 2017 - Aug 2018 & May 2015 - Apr 2016

Technologies: Angular 5, Java Spring Boot, TypeScript, MEAN Stack, SCSS, Microservices, REST APIs

- **Built Standalone ECM application from scratch** using Angular 5 and Java Spring Boot microservices architecture, delivering responsive, device-agnostic catalog management solution 2 months ahead of schedule
- **Mentored 5 junior developers** on Angular best practices, TypeScript, and component-driven architecture, improving team velocity by 35%
- **Engineered Unified Regression Dashboard (URD)** using MEAN stack to replace daily email reports, cutting report generation time by 70% and providing real-time test execution visibility for 50+ engineering teams
- **Resolved 90% of critical defects** in legacy Catalog Manager application, improving client satisfaction scores by 40% and reducing escalations

- **Optimized Unified Workstation (UWS) render performance by 70%** through intelligent caching and virtual scrolling implementation for data-driven UI components, improving user experience for 10,000+ telecom operators

Senior Software Engineer | IBM to BMO | Toronto, ON | Sep 2016 - Dec 2016

Technologies: AngularJS, Java Spring, Microservices, Oracle DB, Jasmine, REST APIs

- **Engineered online account opening feature** for BMO digital banking platform, reducing account setup time by 35% and supporting 50,000+ new account openings monthly
- **Implemented microservices integration layer** connecting AngularJS frontend to Java Spring backend services, improving API response times by 25%

Senior Software Engineer | Rogers Communications | Brampton, ON | Apr 2016 - Sep 2016

Technologies: TypeScript, AngularJS, Java Spring, Oracle DB, Jenkins, Git

- **Developed and maintained Self-Serve portal** for Rogers Eclipse platform serving 500,000+ monthly users, reducing customer support call volume by 30%
- **Implemented automated deployment pipeline** using Jenkins and Git, reducing release time from days to hours

Senior Software Engineer | Hubub | Remote, Toronto, ON | Nov 2011 - May 2015

Technologies: PHP, Laravel, AWS (EC2, RDS, S3, DynamoDB, SQS), PostgreSQL, Redis, Solr, AngularJS

- **Architected and scaled social media platform** to 500,000+ daily active users using AWS cloud infrastructure, generating \$2M+ annual advertising revenue
- **Designed and implemented ad server** serving 500,000+ daily impressions with real-time bidding and targeting capabilities, contributing \$2M+ annual revenue
- **Built comprehensive admin portal** managing 500,000+ user accounts, content moderation, and analytics dashboards

- **Led database migration** from MySQL to PostgreSQL on AWS RDS, achieving zero downtime and 40% query performance improvement
 - **Implemented caching strategy** using Redis and Memcached, reducing database load by 60% and improving page load times by 50%
-

EDUCATION

Bachelor of Science in Computer Science | Algoma University | Ontario, Canada | 2009

Bachelor in Information Technology | Al-Khair University | AJK, Pakistan | 2002

KEY ACHIEVEMENTS

- Successfully scaled healthcare platform serving 900+ hospitals with 99.99% uptime SLA
- Led distributed teams across 3 continents delivering complex enterprise solutions
- Achieved 60%+ performance improvements through architecture optimization and AI-assisted development
- Generated \$2M+ revenue through ad platform engineering and optimization
- Consistently delivered projects 20-50% ahead of schedule while maintaining quality standards
